

GP Roller Axle Puller

#420-697

Quick and easy removal of P drive forward and reverse torque rollers, for 2019 and newer 600R-900T and 2020 and newer 850.

Instructions: Upon clutch removal and disassembly, remove both spring roller pins from roller axle, usually side cutters or dykes work well being careful not to cut off roll pins. Thread GP axle puller into axle and line up black alignment dot with roll pin hole. Use 8mm wrench or socket and tighten to pull axle out to change rollers. Reinstall axle using axle removal tool, tapping axle in making sure to line up roll pin holes, install new spring roll pins.
